

# SAY "BYE" TO BLOCKED BACKUP CAMERAS

Busy parking lots, bustling neighborhoods, and narrow driveways can be overwhelming when backing up. Add a hitch lift and mobility device to the rear of the car and it can be enough to make you break into a cold sweat.

## MULTIVIEW: THE BACKUP CAMERA THAT WON'T BE BLOCKED BY LIFT PLATFORMS OR MOBILITY DEVICES!

Camera lenses are fixed in two positions to automatically provide a clear view when platform is stowed or deployed with a mobility device

Mounts to the edge of the platform, out of the way from mobility device wheels

Raised Platform

Lowered Platform

In-vehicle display monitor provides a clear view behind the vehicle and lift

Convenient view from driver's seat with a rearview mirror or a moveable auxiliary monitor

Monitors are hard-wired to the camera for minimal glitches experienced with wireless devices.

**THERE ARE 30,000  
BACK-OVER ACCIDENTS IN  
THE US PER YEAR**

**30-40% OF ALL  
CRASHES HAPPEN WHEN  
VEHICLES ARE IN REVERSE**

**DRIVERS 70+ SAW  
REDUCTIONS IN ACCIDENTS BY  
36% WITH A BACKUP CAMERA**
